- 9. CONCLUSION**

If you need additional information about the game, do not hesitate to consult my networks, just below:

1. PRESENTATION

If you are here, it is because you are interested in the new NFT game, Sorare. And for good reason, there are numerous advantages, since this game will allow you to earn money (while having fun) thanks to the performances of your favorite footballers.

However, especially for beginners, the basic principles may seem inaccessible, even though the world of crypto and NFT is becoming more and more popular.

That is why, in this guide, you will find all the answers to your questions and the essential information necessary to start playing.

Firstly, let us take the time to briefly introduce the game in order to make you understand its recent success. Of course because, the game will be soon celebrating its 4 years of existence!

THE ORIGINS OF SORARE:

Sorare is an online trading card game. These cards represent soccer players that you can assemble in teams. The cards are NFT, in other words, they are unique coins with a real monetary value that fluctuates according to the performance of the real player.

Simply put: the more a player is "rated" the more his SORARE card will gain value and vice versa.

All this, implemented in a system that can allow you to earn money in multiple ways, either by playing or by buying/selling cards. However, we will come back to this!

Just note that Sorare is a French company that launched in 2019 and already has over a million players!

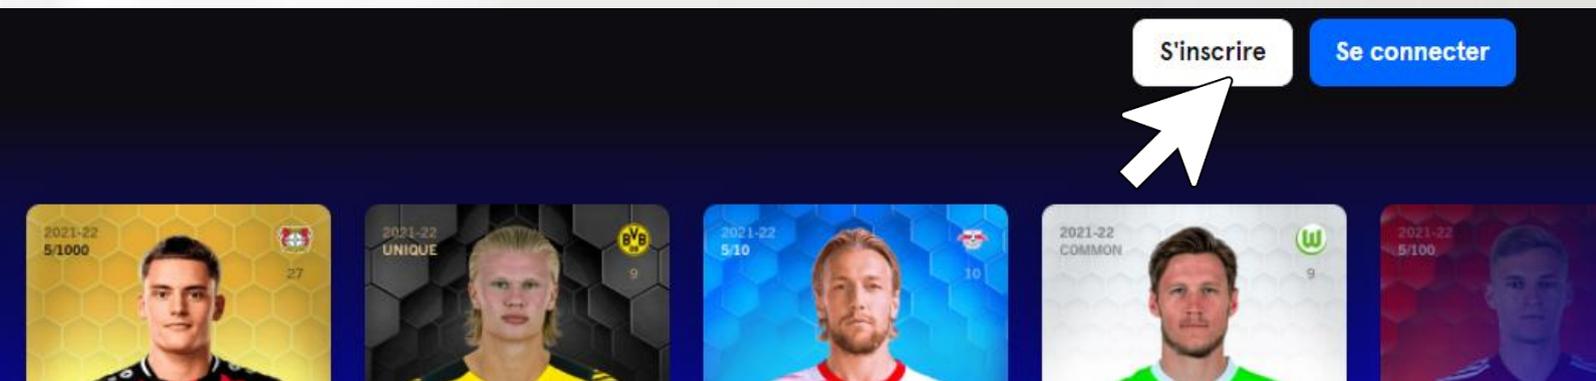

And as shown by many articles, the excitement around this game is only growing.

How SORARE increased its revenue by 40 folds in one year

Crowned as the most valuable French start-up of 2021, before being overtaken by Back Market, Sorare claims to have multiplied its turnover by 40 in one year, going from 8 million dollars in 2020 to nearly 325 million in 2021.

2. HOW TO REGISTER?

Now then, how can one register and play this game?

Firstly, **YOU MUST NOT** go to the website and click on register!

Of course, since Sorare has set up a sponsorship system that allows everyone to win sponsorship cards.

Whether it is via my link or not, I really urge you to use a referral link to create your account and make your first card purchases.

Why?

Once you have purchased your first 5 cards at the auction, you will get a free card (and so will your sponsor). With a little luck, the value of this free card could greatly amortize your previous investments.

Only benefits, so why deprive yourself of these?

Personally, I take my job as a sponsor very seriously, because it is WN-WN and I spend time every day answering all the questions of my sponsored members.

Today I have more than a hundred referrals with whom I communicate regularly on discord, and whom I try to guide as well as possible in the game!

Getting started in the game is really important!

I'm leaving you my referral link right here, should you be interested in my assistance!

3. BUYING YOUR FIRST CRYPTOS

As you can see, you will need money to buy your SORARE NFT cards and the official currency of the game for now is a cryptocurrency called ETHEREUM.

Once you must have registered on the Sorare website with your email address and a very secure password (+ the double authentication, which I recommend you to activate at 200%), you will need to purchase your first ETH

If you do not understand what I am talking about, do not worry, I will explain everything in the next 2 pages.

"EASY" METHOD FOR BUYING CRYPTOS:

Sorare's goal is to make it as easy as possible to use.

As such, if you did not understand the previous page, then this one is for you.

When you want to simply buy your ETH on Sorare, you have 2 methods RAMP or MOONPAY.

This transfer method is direct and allows you to buy ETH in a few clicks with your credit card or bank transfer.

At the first transaction, you will be asked to verify your identity and pay a small fee (about 1%, which is often paid by SORARE during certain promotional periods).

These fees are unavoidable when buying ETH, either with this method or with the "Expert" method, which I will detail on the next page.

“EXPERT” METHOD FOR BUYING CRYPTOS:

This "EXPERT" method will eventually be mandatory in the future if you want to take out your ETH from SORARE to resell them and transfer them to your bank account. (You can't send money to your bank account with RAMP or MOONPAY)

Like with all crypto-currencies, its value fluctuates over time. The ideal is to buy it when the price is at its lowest to get more.

This ETH can be bought on a marketplace like Binance.com, COINBASE (the easiest to get started). You have to create an account on COINBASE to buy or sell your Ethereum.

(I will leave you my referral link so that we can each get €8 in Bitcoin).

You will then need to create a METAMASK account which will be connected to the SORARE game. When you send ETH to your METAMASK and then deposit the METAMASK to your SORARE account, you will need to pay the Blockchain gas fees which can vary greatly depending on the activity (between €2 and €50 per transaction).

Depending on the gas price, you can decide whether or not to use the "EXPERT" method. In any case, however, I reiterate that you will need to open a COINBASE account to get your money back from SORARE

4. RULES OF THE GAME

Now that you have the basics, you can now start playing.

But first, let us get to the heart of the matter and the rules of the game.

To start playing you must have a minimum of 5 cards. Namely:

- A midfielder
- A defender
- An attacker
- A goalkeeper
- An additional card of your choice

These cards will allow you to build your first team and to play during the GW "Game Week".

But what is this?

I will explain everything on the next page.

THE PRINCIPLE OF THE GAME WEEK

With your virtual team made up of 5 cards, you will be able to play twice a week (because there are two game weeks, GW/ week):

- From Friday noon to Tuesday noon
- From Tuesday noon to Friday noon

So twice a week, you will align your cards, form your team and validate it for the next GW. All with the aim of getting a big score.

Everything will become clearer as you progress through this guide.

THE DIFFERENT TYPES OF CARDS IN THE GAME:

When you start buying your first cards, you will notice that there are 4 categories:

- The Limited (1000 cards of one player per season)
- The Rare (100 cards of a player per season)
- The Super Rare (10 cards of one player per season)
- The Unique (1 player card per season)

Each of these rarities (Categories) has different characteristics. Of course, the rarer a card is, the more powerful it is, and the more it will allow you to access divisions with important rewards.

Of course, the more limited copies of the card are available, the more valuable it is likely to be (but the cost could also be higher if you get it late).

Let us break down each of these categories.

1000 Ex.

THE LIMITED CARDS:

This category of card was only recently added to the game, and each year 1000 Limited cards are created by SORARE for the game.

As a result, they make the game much more accessible because they are the cheapest on the market.

Owning these cards only allows you to play in the Limited division (Ex Division 5).

They do not give any bonus due to their rarity.

The first year of obtaining them, they give a 5% score bonus like ALL THE OTHER CATEGORIES OF CARDS.

Rarity	Cards per season	Level	XP Bonus	Possible Divisions
Common	Unlimited	1 to 20	0 to 10%	Casual
Limited	1000	1 to 20	0 to 10%	5 Limited cards in D5 Limited
Rare	100	1 to 20	0 to 10%	5 Rare cards in D4 or D3
Super Rare	10	1 to 20	0 to 10%	2 in Rare Pro D3 or 5 Super Rare in D2 or 2 in D1
Unique	1	1 to 20	0 to 10%	5 Unique in D1 or 1 in D2

CHAMPION AMERICA LIMITED
 359th - 326.04 pts (29th - 710th)

Example: Div. 5 Limited AMERICA

TIER 3 LIMITED - 16.58 TO TIER 2 LIMITED

Clément Diop: 16.9 x 1.075 (18.2)

Andrew Farrell: 79.1 x 1.065 (84.2)

Carles Gil: 84.3 x 1.3 (109.6)

Hany Mukhtar: 60.7 x 1.085 (65.9)

Carlos Vela: 44.0 x 1.095 (48.2)

The score is multiplied by the bonus of the card 6,5% (5% current year card + 1,5% XP) See next section for XP

THE RARE CARDS:

Each year, 100 Rare cards are added to the game.

Possessing these cards, you can only play in divisions 4 Rare and 3 Rare Pro.

They do not give any bonus due to their rarity.

The first year they are obtained, they give a 5% score bonus like ALL OTHER CARD CATEGORIES.

Rarity	Cards per season	Level	XP Bonus	Possible Divisions
Common	Unlimited	1 to 20	0 to 10%	Casual
Limited	1000	1 to 20	0 to 10%	5 Limited cards in D5 Limited

Example : Div. 4 Rare – European Champion

TIER 2 RARE - 64.01 TO TIER 1 RARE

The captain's score is multiplied by the captain's bonus 20% + the card's bonus 9%.

SUPER RARE CARDS:

Each year, 10 Super Rare cards are added to the game.

Possessing these cards only allows you to play in divisions 3, 2 and 1.

They give a 20% bonus due to their rarity.

The first year of obtaining them, they give a 5% score bonus like ALL OTHER CARD CATEGORIES.

Rarity	Cards per season	Level	XP Bonus	Possible Divisions
Common	Unlimited	1 to 20	0 to 10%	Casual
Limited	1000	1 to 20	0 to 10%	5 Limited cards in D5 Limited

UNIQUE CARDS:

Each year, 1 Unique card is added to the game and obviously they are not very accessible to the common man because of their crazy price.

Possessing these cards, you can only play in Division 2 and 1.

They give a 40% bonus due to their rarity.

The first year they are obtained, they give a 5% score bonus like ALL OTHER CARD CATEGORIES.

THE XP EXPERIENCE OF THE CARDS

As in most video games, it is possible to gain experience and therefore to level up.

This is the case with your cards.

The XP bonus allows you to obtain additional points for each of your aligned players. It is therefore extremely important to have high XP cards to make the difference in the final GW ranking.

Your cards gain experience when they are used in the game. The accumulated experience allows you to raise your cards' level.

Cards can go from level 1 to 20 during their lifetime.

Level	XP Required
1	100
2	200
3	400
4	600
5	900
6	1300
7	1800
8	2400
9	3100
10	3900
11	4900
12	6000
13	7300
14	8800
15	10600
16	12600
17	15000
18	17700
19	20900
20	24500

To put it simply, a card gains roughly 140 pts per match or training. So you can see that it is very easy to level up quickly to reach the 1st levels.

It will take about 3 full seasons for a card to reach level 20 and thus the 10% bonus!

OF COURSE because!

1 XP level = 0.5% Bonus

WHAT DIVISION TO CHOOSE?

As you have seen, depending on the cards you have, you can or cannot play in a particular division.

The first thing to understand is that there is not really a division that is better than another. It is all about budget.

99% of managers start in either Limited D5 or Rare D4. Yes indeed, at the moment the All Star Rare D4 division is very interesting because it rewards all managers who reach the following levels:

- 205 pts will give you 0,01 ETH
- 250 pts will give you 0,02 ETH

This is still a very simple and motivating way to enter the game, but this system will be different in a very near future (probably summer 2022). Since Sorare promised us a new GamePlay to motivate, even more, the new and old managers to get into the game 100%.

All Star		7 610	S'inscrire
1	0,33 ETH 766,26 € + ● 1x Star Rare		
2	0,2 ETH 464,40 € + ● 1x Star Rare

Paliers			
Score > 250	0,02 ETH 46,44 €		
Score > 205	0,01 ETH 23,22 €		

This strategy is one of the numerous ways to earn money with Sorare, it is called the S05 strategy, but some Managers do not play and are 100% into buying/selling. This also works perfectly.

However as you have understood, SORARE necessarily means a prior large investment, even though the game is becoming more and more accessible with the arrival of Limited cards.

In any case, in this guide you will find all the preliminary budgets to build a team and start playing.

From this perspective, it is more interesting to put in a large amount of money at the beginning of the game, to make sure that your team is running smoothly, rather than rowing and losing money quickly.

Here is a table from the excellent site <https://sorare-probabilitychecker.vercel.app/rewards> to give you an idea of the points needed to attain a reward.

129 - 350	T3 Limited	0	1,3%	

THE BUDGET ON SORARE

- 0€ - 700€: I recommend you to carry out Limited Buy/Sell Trade to prepare a sufficient budget for a team.
- 700 - 1500: 5 Limited cards for your first team! I recommend that you really make the strongest team possible before making a 2nd one. Know that at the moment, you can make very strong teams in Limited ASIA or AMERICA for about 1500€.
- 1500€ +++ : From 1500€, I think you can start playing in All Star Rare D4 by buying 4 Rare cards without your Goalkeeper (which is very expensive and that you will be able to use as a Grey card vs a -50% malus) to get the famous 0,02Eth levels with 250 pts.

In the meantime, you can still play and understand the basics of the game for free, using grey cards in Casual mode only (see below).

THE ROLE OF THE SUBSTITUTES:

At the beginning, you will have few, if any, substitutes (depending on your budget).

However, do not hesitate to get some as soon as possible!

Indeed, imagine that you have the Mbappé card (well done, you have a great card).

If Mbappé gets injured (in reality) and cannot play anymore, the card becomes unplayable and will lose value during this period.

However, if you do not have another card, you would not be able to play at all because you need to field 5 players per team! The substitutes are there to help you.

Note that Mbappé will probably come back to play after his injury, and the card will gain value again. Sorare is also a game of patience like any investment. This is not a casino!

A SIMPLE STRATEGY TO GET STARTED:

When you are about to build your first team, allow me give you the following advice:

- Pick a club right away with which you want to run your divisions. Be aware that the game adds new clubs every week, and that there are over 250 clubs today, including almost all of the Premier League!
- Take a club that is currently playing or wait for the next season. Indeed, whether you choose a Japanese club or a French club, the dates of the games and the organization of the season will vary.
- As soon as you can, take substitutes.

5. SORARE DATA AND SORARE SCORING

Before I go any further, I absolutely must tell you about Soraredata. As a player, this is without a doubt the site where you will spend the most time.

Indeed, this site is all-in-one, since it directly allows you:

- To position yourself on your Game Week in a few clicks
- To watch your players' matches live
- To have access to your team's results
- To consult the primary market
- To consult the secondary market
- To buy and sell cards
- To do intensive scouting!

SCORING ON SORARE

On this site you can find out which players are the best to own according to their position and how their performance is changing.

As a beginner, here is how to analyze and understand the players' score.

The Decisive Score = DS

This is a score that will go up when your player makes a decisive action and conversely, if it is a mistake.

Level	Points	Guarantee ?
-1	15	No
0	35 (25 for substitutes)	No
1	60	Yes
2	70	Yes
3	80	Yes
4	90	Yes
5	100	Yes

DECISIVE SCORE DS	
Positive Action	Negative Action
GOAL	Red card
Assist	Own goal
Penalty won	Penalty conceded
Goal line clearance	Error leading to goal
Last defender tackling	3 goals conceded min (Goalkeeper)
Clean Sheet (Goalkeeper)	
Penalty save (Goalkeeper)	

The All Around Score = AA

This score gives you an indication of a player's overall performance for non-decisive actions (successful passes, attempted shots, duels won etc.)

- General: yellow card, foul committed, foul won...
- Defense: goal conceded, successful tackle, block...
- Possession: lost/gained possession, duel won/lost...
- Attack: shot on target, missed big chance, missed penalty, entered the 18 yard box...
- Passing: pass leading to a big chance, successful pass, missed pass...
- Goalkeeper: shot on target stopped, shot saved with fists, dive...

6. BUYING YOUR FIRST CARDS

Now you know enough to buy your first cards.

To do so, you will need the ETH cryptocurrency that you will have in your crypto wallet, or bought with RAMP/MOONPAY.

The great advantage with Sorare is that you do not need to pay any commission on your transactions, unlike other P2E (Play to Earn) games.

You can buy and sell your cards to other managers without any commission.

This is even more advantageous when you consider that transaction costs on the ETHEREUM blockchain are enormous.

I will now introduce you to the 2 markets to buy cards:

- The Primary Market (auctions)
- The Secondary Market (between managers)

THE PRIMARY MARKET:

I guess you followed the Buzz of the HAALAND UNIQUE card, sold on the primary market (auction market) for a whopping €614,000.

Cards are created (minted) by SORARE and put up for sale for a given time. Whoever makes the highest bid in ETH and is not countered, wins the card.

Note that it is not possible to make a last minute bid and get away with the card, since this automatically adds 1 minute to the countdown as soon as a bid is made.

The minimum overbidding is +10%.

You can find these offers on the Sorare official website or on Soraredata.

NB: Please note that the card offered under the sponsorship is only offered if you purchase your cards on the primary market, i.e. at the auction.

THE SECONDARY MARKET:

The secondary market is characterized by the sale between individuals.

On this market, the owners of the cards put them up for sale and decide on the price.

Now you have two choices:

- Buy at full price and do not negotiate the card (Buy Now)
- Make a lower offer than the asking price.

I highly recommend you to select the second option which will allow you in most cases to have discounts of 40% 30% 20% or 10%.

Moreover, on SORARE, you will be able to find the private Managers' Discord, which will allow you to discuss directly for a better negotiation.

WATCH OUT FOR THE CLEVER LITTLE ONES!

If you are the one selling a card, watch out for the clever little ones.

If you sell a card for 0.8 ETH, some people will offer you 0.08 ETH, hoping that you won't see that there is an extra 0 behind the decimal point, and that you will mistakenly accept it.

I have been fooled like this before, it is a common technique.

Now, know that on the blockchain, there is no great panel whereat you can table a complaint, so you are fully responsible for your actions.

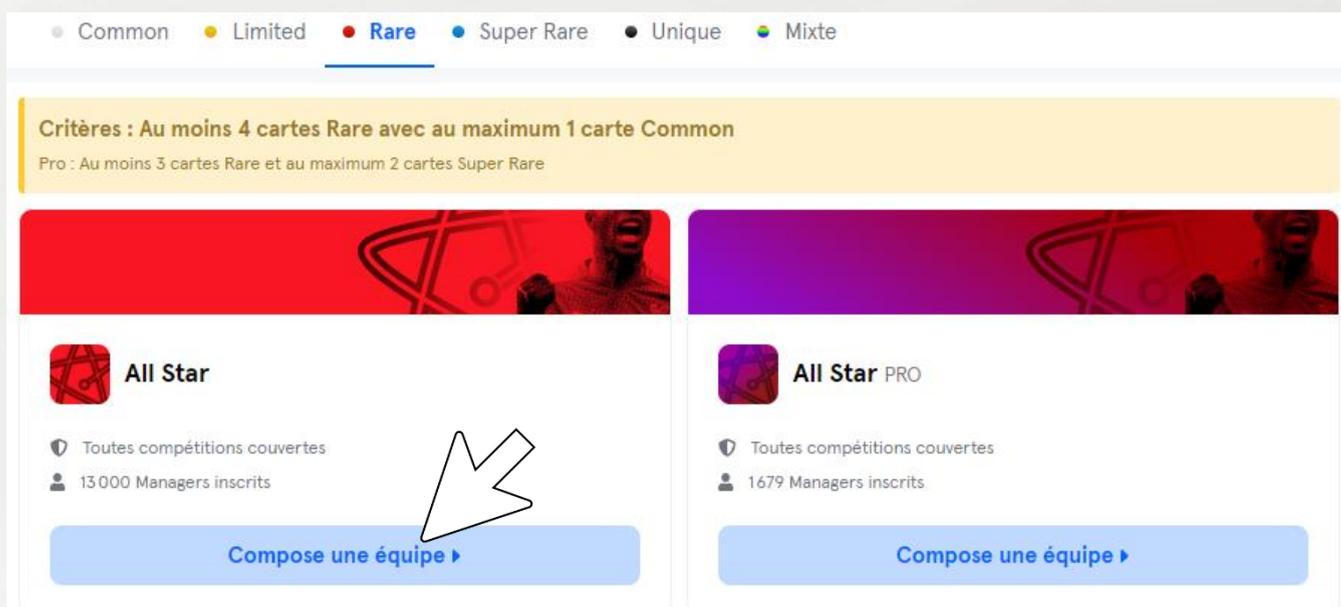

7. STARTING TO ENJOY

That is it; you now have all the cards in hand to start playing and having fun!

Once you have bought your first 5 cards, wait for the next Game Week and put your team on the field.

Do not forget your captain, who gives a 20% bonus

To see your team's results, do not hesitate to check the "My S05 results" tab on Soraredata. To watch the matches live and enjoy them with your friends, go to "Game Week Center"!

8. SORARE COMMUNITY

You should know that all NFT projects on the blockchain that makes sense must have a solid community.

Sorare has already proven itself and it is not surprising to have an extremely active community around the game.

I invite you to immerse yourself, as you will see lot of benefits.

By clicking [HERE](#), you can access the Discord of the French-speaking Sorare community.

By clicking [HERE](#), you can access the official Sorare Discord.

I also have a Discord Server but it is reserved to the most faithful of my community, you have to attend my Twitch lives and accumulate 10.000 pts!

Otherwise you already know my Facebook group, I guess?

<https://www.facebook.com/groups/1020227825230013>

THE ADVANTAGES OF THE DISCORD:

Thanks to it, you will be able to:

- Meet people in the community
- Get the latest news about the game
- Get free tips and tricks
- Negotiate your cards by talking directly with the seller
- Negotiate your loans

On this last point, you should know that you can indeed get cards lent to you by users, for a fee of course.

9. CONCLUSION

In short, we have just seen in this little guide how to play Sorare and the advantages you can get from it.

This P2E game will allow you to earn money while having fun.

However, I would like to give you this legal notice:

This is not an investment advice!

You can lose money as well as make money, should you fail to adopt the right strategy. Only invest what you are willing to lose. For the rest, have fun and with a little patience and common sense, you will achieve excellent results.

Anyway, do not hesitate to contact me personally if you have any questions and join me during my TWITCH lives on Tuesdays at 4pm for lots of tips and fun!

You can find this guide in a YOUTUBE video version by clicking here. And as a 2nd option, come and visit my website, otherwise see you every day on Twitter
